

Oval embouchure

Square embouchure

HERNÁNDEZ embouchure

Artificial ivory riser embouchure

MODELS AND COMBINATIONS

At Hernández Flutes we propose three types of embouchure: **oval**, **square**, and the **Hernández design**.

The **oval** embouchure gives a rounder sound; the **square**, an open and more powerful sound; and the “**Hernandez**”, is square in front and where the lips rest, oval. This type of embouchure can be open and powerful, but you can feel the control you get with the oval embouchure when playing.

You have the option to combine this with lip plate: **high**, **medium** and **low**.

With the **high** lip plate you get rich tone colours with strong fundamental in the low register; with the **low** lip plate, the easiness is reached in the middle and high registers. The **medium** lip plate: it is precisely the balance between the two.

High, medium and low lip plate models.
